

How to keep track of the score

This is how you keep track of the score in pickleball. In general, the trick to keeping track of the score in pickleball is to realise that the players who **start the game on the right side of the court** will always be considered the “even” player. This means that whenever they are **on the right side of the court**, their score will **always** be even.

At the very beginning of the game, **note who is on the right side for each team.**

Whenever that player is on the **right side of the court**, his/her team's score **will always be even** and whenever he/she is on the **left side of the court**, his/her team's score **will always be odd**.

Always! And it doesn't matter if they're serving or not.
